Forecast for Saturday 05 Nov 2022

Weather: Some clear spells at first but cloud increasing from the west, bringing some patchy rain to western fells. Then a cloudy start to the day with outbreaks of rain edging east through the morning, becoming more persistent and occasionally heavy towards midday. The rain clears away southeast through the afternoon with sunny spells developing. The evening then looks dry with some long clear spells.

Chance of cloud-free hill tops above 800m: Around 75% over northeastern fells at first falling to 25%, elsewhere close to zero through the morning, rising to 90% from the northwest through the afternoon.

Low cloud and visibility: Periods or persistent cloud above 450-600m, but more occasional above 600-750m in the northeast at first, becoming just small amounts below the summits, from the northwest, through the afternoon. Away from cloud visibility good falling to several kilometres in rain, becoming very good through the afternoon.

Meteorologist's View

Gusts around 60mph over ridges and summits for a time around the middle of the day. Feeling very cold on summits, especially in rain.

Forecast for Sunday 06 Nov 2022

Weather: Cloud increasing through the early hours with outbreaks of showery rain spreading southeast. Then a rather cloudy day, best of any brighter or sunnier spells across eastern fells, with heavy and perhaps thundery showers, these most frequent in the south and west.

Maximum wind: Southerly or southwesterly 20-25mph, gusts around 40mph over ridges and summits, increasing a little through the evening.

Chance of cloud-free hill tops above 800m: Around 40% across southern and western fells but nearer 75% in the north and east.

Low cloud and visibility: Occasional or, more especially in the south and west, periods of cloud above 600-750m lowering to 450m with patches below, in heavier showers. Outside of cloud visibility very good falling to several kilometres in showers.

Temperature: **Valleys:** Around plus 1 Celsius in early hours rising to plus 11 or 12 Celsius by day.
At 800m: Around plus 5 Celsius
Freezing level: Above the summits.
